Standard Notes: - Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (X) Not applicable.

n.e.c. Not elsewhere classified.

In computing these ratios contract or subcontract employment serving the establishment is excluded. The cost of contract or subcontract work expressed as a percent of payroll for 1963 was: for metal mining, 21 percent; for anthracite mining, 38 percent; for bituminous coal and lignite mining, 9 percent; for oil and gas extraction, 93 percent; and for nonmetallic minerals mining, 12 percent.

Represents establishments with zero or negative value added; establishments with no employees; and for number of employees and separately reported central offices and related facilities.

Not shown since cost of supplies, fuels, purchased electricity, energy, contract work, and purchased machinery installed exceeds value of shipments and receipts plus capital expenditures.

Figures for ratio class 0.80 to 0.89 are included with those for ratio class 1.00 and over.

Distributions for two industries are withheld to avoid disclosing figures for individual companies. The following table shows the number of establishments by ratio of payroll to value added in mining for these industries:

	Ratio of payroll to value added in mining	1477	1479
